

We, humans, have forgotten how to enjoy the simple joys of life. We are struggling all the time to make a success of our lives. A child will desperately play hard to win a race/a game, not to enjoy it. In our youth we tend to work hard at academics, not for the knowledge gained but just to achieve a top ranking. As adults we try to perform at our optimum in the workplace to achieve something we believe we see on the horizon.

When do we stop to just enjoy the cool air, the chirping of the birds, that golden red sun setting just over the horizon. We just want the pot of gold at the end of rainbow, oblivious of the beauty of the rainbow itself. When do we just sit and marvel at the amazing colours of those tiny birds, butterflies, the bright red and black of the ladybug. Simple pleasures that these birds and animals enjoy, we never seem to understand neither do we try to appreciate them. The child will imbibe this from the parent. They too take all this for granted without giving it a single thought. As and when we do get the opportunity, we must inculcate in our children the simple joys of this world before someone says "ashes to ashes, dust to dust".

When our child is born Life lived does not depend on how long one lives, but on how well it was lived. Success in this world can be achieved in many ways. Most of us associate success with possessions while in actuality, a well read, well travelled person, with less possessions, might have lived a more fruitful life. Impress upon the children, the little wonders they must enjoy in this world. Possessions do not bring happiness. It only creates greed for more.

Estd. 1882

Children require to be taught this. Simple habits such as reading and enjoying nature will not only ground our child but it is the best possible way of enriching oneself. As parents we wish the best possible future with success, that is mainly translated into money for our children. In the desire to show them the path to success we forget to enjoy our very own life, in turn showing the wrong path to our children of not enjoying the success which we worked so hard to achieve but continue to strive until the end.

Even though we feel we know what is best for our child, we tend to make the path ahead of our children a very difficult one. Everyone does find their way eventually. We as parents have to just gently guide them towards it. Yes, at times a push or even a shove might definitely be required but what is important here is understanding the strengths and weaknesses of your child as not everyone can be Michael Jordan, Steve Jobs or Margaret Thatcher .

We have to ensure that we inculcate the right values in our child. Teach them right from wrong, truth, empathy, and give them plenty of opportunities to choose from. Allow them to grow not only physically but mentally too, creating strong, yet sensitive, intelligent citizens. Give lots of love and care, that you did shower on them as small children but forgot about, as they grew older. It becomes all about the achievements, success, aims, for a triumphant future. We at times try to force our unfulfilled ambitions on this very child whom we brought into this world with such desire, nurtured and cared for with no thought to our own self.

Here I come back to where I began, the very nature we have forgotten. That nature, we were born into but we do not take out five minutes from our unnatural world full of artificial possessions. We have forgotten to enjoy this wonderful nature . Start living again. Enjoy your time here.

Enjoy your children and teach them that there is so much more to life than material possessions. Revere the miracle of life.

Enjoy the rainbow on the way to the pot of gold! A wonderful life lies ahead.

EVS ACTIVITY, CLASS - 2

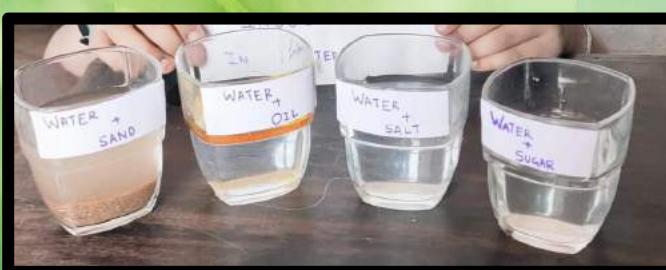

Online activity based on the Chapter Festive Time.

The students displayed their creativity by making paper Diyas and beautifully decorating it.

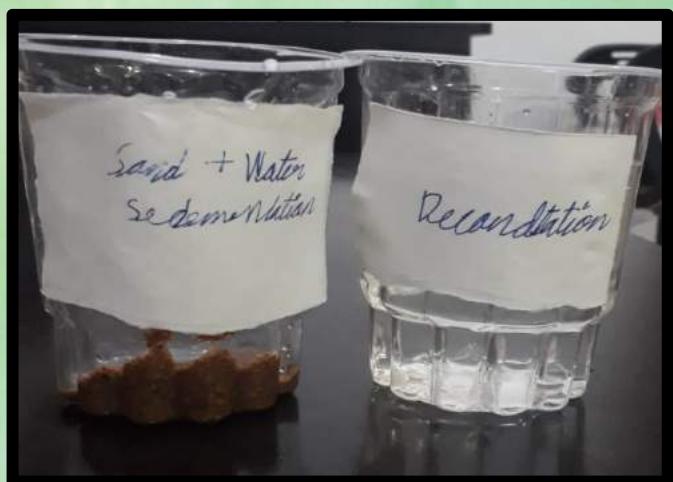

SCIENCE ACTIVITY, CLASS - 3

Online activity based on the Chapter Some Properties of Water.
Students performed various activity to explore the properties of water.

SCIENCE ACTIVITY, CLASS - 4

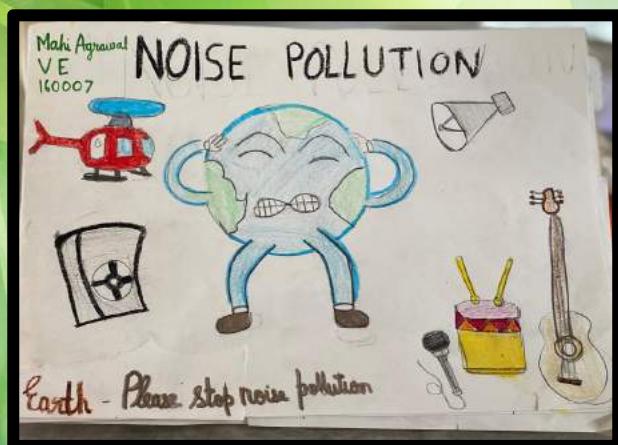

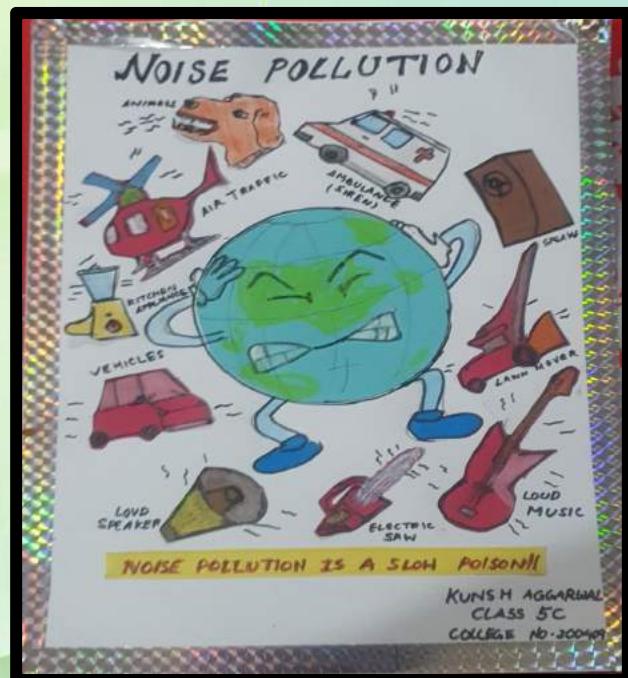

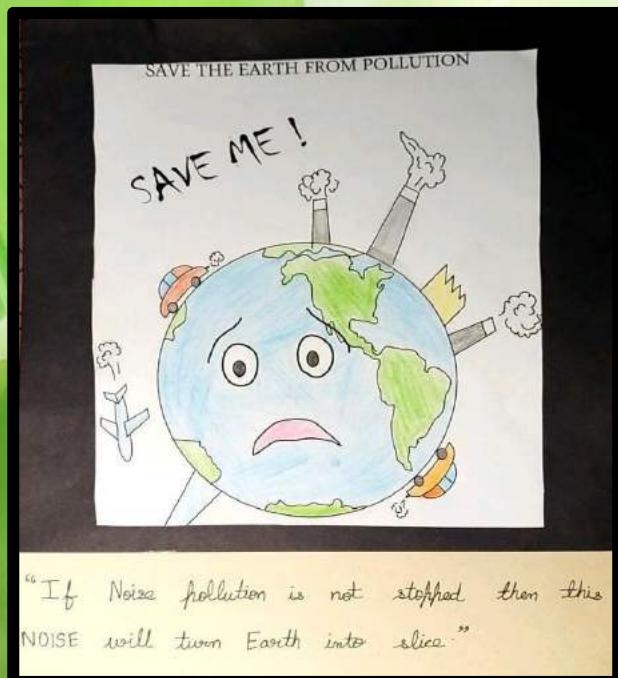

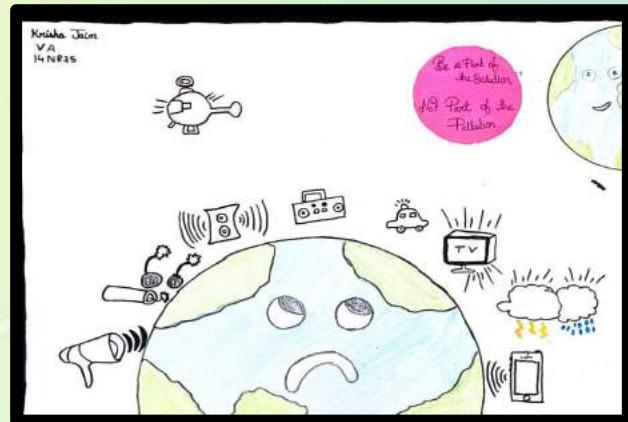

Online activity based on the Chapter Materials and Solutions.
Students were introduced to the distinctive properties of solutions.

SCIENCE ACTIVITY, CLASS - 5

Online activity based on the Chapter Sound and Noise.

Students made posters and wrote a slogan on noise pollution to create awareness about environmental pollution.

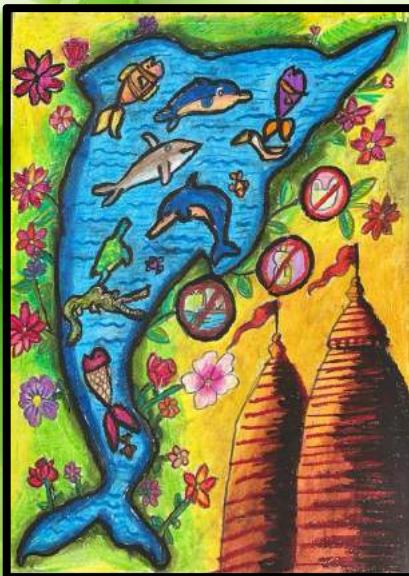

Our Young Achievers

Ashwati S.Kartha of Class 4B participated in the All India Dance Festival-2021 held in Vishakapatnam on 21st Dec, conducted by Natyaravali Music and Dance Academy. She was felicitated with Natyaabhinaya Award for her outstanding contribution to Indian Classical Dance(Bharatnatyam) as a performing art.

Nitya Bachhawat of Class 2F participated in National level Kalantar Online Art Fest and secured a position in top 20 out of 8000 entries.

Aryan Bhatia of Class 3B, won 2nd Runner up Trophy in Badminton Club Tournament held at VIP Club in November, 2021.

Republic Day Celebration was a low key affair consecutively for the second year at Rajkumar College, Raipur, due to the COVID-19 pandemic. The Principal unfurled the national flag while adhering to all COVID-19 safety protocols. He extended his best wishes on this occasion to the faculty members, students and their families.
