

8<sup>th</sup> Edition

1<sup>st</sup> February, 2025

Many parents out of love and concern solve all their children's problems without allowing them to struggle or find solutions on their own. While this may seem like good parenting, it often weakens a child's ability to handle challenges in the future. When parents intervene too much—completing homework, resolving conflicts or protecting children from failure—they deprive them of essential problem-solving skills.

Children need to experience setbacks and difficulties to develop resilience, confidence and independence. If parents always step in, children become dependent on external help rather than learning to navigate obstacles themselves. They may struggle with decision-making, emotional regulation, and perseverance when faced with adversity later in life.

Moreover, constantly shielding children from disappointment can lead to unrealistic expectations. In the real world they will face challenges—rejections, failures and hardships that no parent can fix. If they haven't learned to cope with difficulties early on, they may become anxious, frustrated or incapable of handling stress.

To raise strong, self-sufficient individuals, parents should encourage problem-solving by guiding rather than fixing. Instead of providing immediate solutions, they can ask open-ended questions that help children think critically. Teaching them to face consequences, take responsibility and learn from failures will prepare them for adulthood. A supportive but non-interfering approach ensures children grow into resilient, capable and confident individuals ready for life's inevitable challenges.

## MY TEACHER

My teacher guides with gentle care,  
In every lesson, love is there.  
With every word, she lights the way  
Thank you, teacher, every day .

## A DAY IN THE ZOO

I went to the zoo,  
And saw the animals,  
Some birds were singing,  
And Monkeys were jumping,  
Lions were roaring,  
And Bears were sleeping,  
There were elephants,  
Snakes, fish and giraffes too,  
I had a lovely day in the zoo.

## GLOBAL WARMING

Global Warming is the rise in the Earth's average temperature over a long period. It is a matter of concern nationally and internationally.

It has a dangerous effect on our environment. Pollution, the Green House effect, Deforestation, urbanisation, Rapid industrialization, and a lack of tree plantation are some of its leading causes.

Global warming has a plethora of effects on our ecosystem. Climate change poses a serious threat to wildlife due to its association. It has led to the melting of glaciers, leading to a rise in sea levels. This results in floods, unseasonal rainfall, and extreme heat and cold in various areas. The imbalance in the ecosystem is responsible for species extinction. Marine life is also being widely affected. There have been deaths of different marine species.

We can reduce the effects of Global warming by spreading awareness about it, planting trees, conserving water, using recyclable materials, conserving and saving energy, more using of green energy.

Realising its harmful consequences, all the nations of the world should join their hands together, to save our mother planet. This will lead us to the right path for our sustainable development.

## CASPY, THE DOG

Once upon a time 🐶 Caspy 🐶 the dog picked the bone 🦴 He was very happy.

He saw the reflection in the water.

He saw a dog with a bone 🦴 then he wanted more bones,

He barked at the other dog. Oh no! The bone fell into the water.

Now Caspy has no bones. 🐶 We learn here a lesson that we should not be greedy.

## SEA BEACH

You are not calm,  
You are so loud  
But I fall in love  
Again, and again.  
Whenever I see you,  
I love your blue water  
It's so clean and salty  
Oh! My dear sea I love your beaches,  
Goodbye for now,  
I will see you soon.

## OUR WONDERFUL NATURE

The study of trees,  
In a world so full of breeze.  
The very windy day,  
It is like a horse playing in the hay.  
The journey of a seed,  
It is inspiring indeed!  
How are the flowers taught to bloom?  
That street in autumn is full of gloom.  
The hardworking roots,  
They are just like fruits.  
The liquid form of plant food is called sap,  
How do the roots work like a tap?  
Our beautiful nature,  
It is like a world adventure.  
There will be an end to this adventure  
When there is no nature.

## SAMUDRA MANTHAN

Samudra Manthan is a very famous story from Hindu mythology. The story is from a very ancient time when Dev and Asura used to live together, and one day a big tragedy happened. All the Devs and Asuras witnessed an unusual movement underwater from which Amrit and Vish were supposed to come out of the water body where all the Asur and Dev ran towards the water body to collect Amrit and to become immortal. In the greed of Amrit Asuras and Dev started fighting, then Lord Shiva came to earth and decided to give Amrit to Dev because of their good hearts and drank all the Vish to save the world.

## प्रिय त्योहार

मेरा प्रिय त्योहार दीपावली है। इस त्योहार में सुंदर रंगोली बनाई जाती है। इस त्योहार में पटाखे फोड़ते हैं। हम हर साल दीपावली पर नए कपड़े पढ़नते हैं। हम सब कहीं घूमने जाते हैं। हम हर साल दीपावली पर घर की सजावट करते हैं। हम हर साल खुशी से दीपावली मनाते हैं।
